### **DETAILED ACTION**

Claims 1-15 are presented for consideration on the merits.

#### ***Specification***

This case is a 371 of PCT/JP03/15092 filed November 26, 2003, and Applicants are requested to update the status of the specification at page 1, line 1.

#### ***Preliminary Amendment***

The Preliminary Amendment filed November 10, 2005, has been received and entered.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on May 24, 2005 was received. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims are rendered vague and indefinite for failing to recite clear and distinct process steps for carrying out the claimed methods of producing beta-1,4-mannobiose containing compositions, and their products because they are all prepared through the function of the same enzyme.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-018793, cited on enclosed PTO-1449 Form.

The claims are drawn to methods and products for producing beta-1,4-mannobiose containing compositions wherein a mannan degrading enzyme is reacted with a natural material that contains mannan to produce effective amounts by weight of beta-1,4-mannobiose.

JP 11-018793 teaches methods and products for producing beta-1,4-mannobiose containing compositions wherein a mannan degrading enzyme is reacted with a natural material that contains mannan to produce effective amounts by weight of beta-1,4-mannobiose. See the abstract.

The claims are identical to the cited disclosure and are, therefore, considered to be anticipated by the teachings of the cited reference.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEBBIE K. WARE whose telephone number is (571)272-0924. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
